PUBLIC

Resume Analyzer

01

https://app.matchpoint.io/

The public Resume Analyzer is available without signing in. Paste your resume and a job description to receive an instant AI-powered match score with detailed feedback.

Feature Overview

- Match Score (0–100) — AI-computed overall compatibility
- Section Scores — Experience, Education, Skills, Certifications
- Matched Keywords — terms present in both resume and JD
- Missing Keywords — important JD terms absent from the resume
- Strengths — what the candidate does well relative to the JD
- Gaps — areas needing improvement or absent from the resume
- Actionable Suggestions — specific, prioritised recommendations

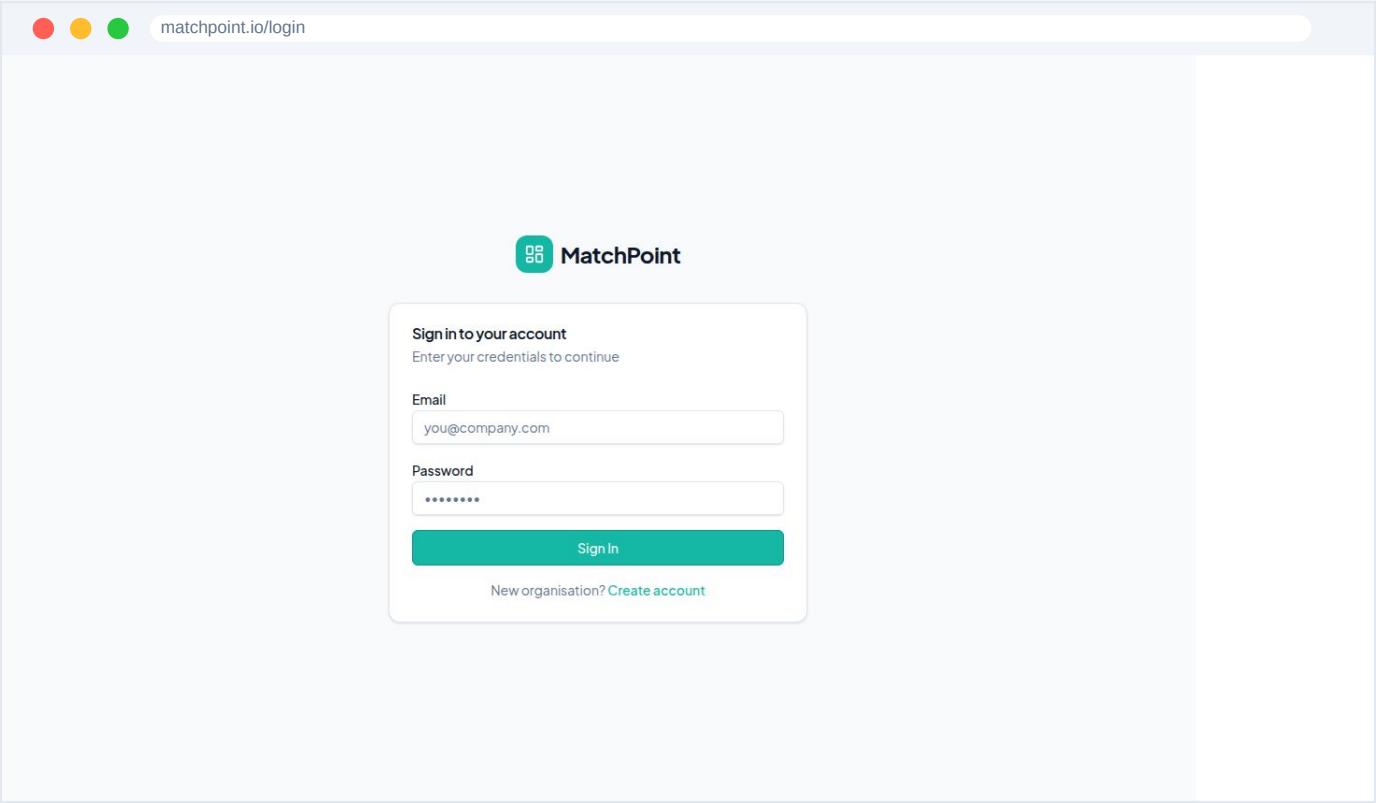
PUBLIC

Sign In

02

https://app.matchpoint.io/login

Secure enterprise authentication. Enter your email and password to access enterprise features. Sessions last 7 days with JWT tokens stored securely.



Key Features

- Email + password authentication with bcrypt hashing
- JWT token valid for 7 days — no need to log in daily
- Automatic redirect to the last visited enterprise page
- Create Account link for new organisation registration
- Role-based access: navigation adapts to your permission level

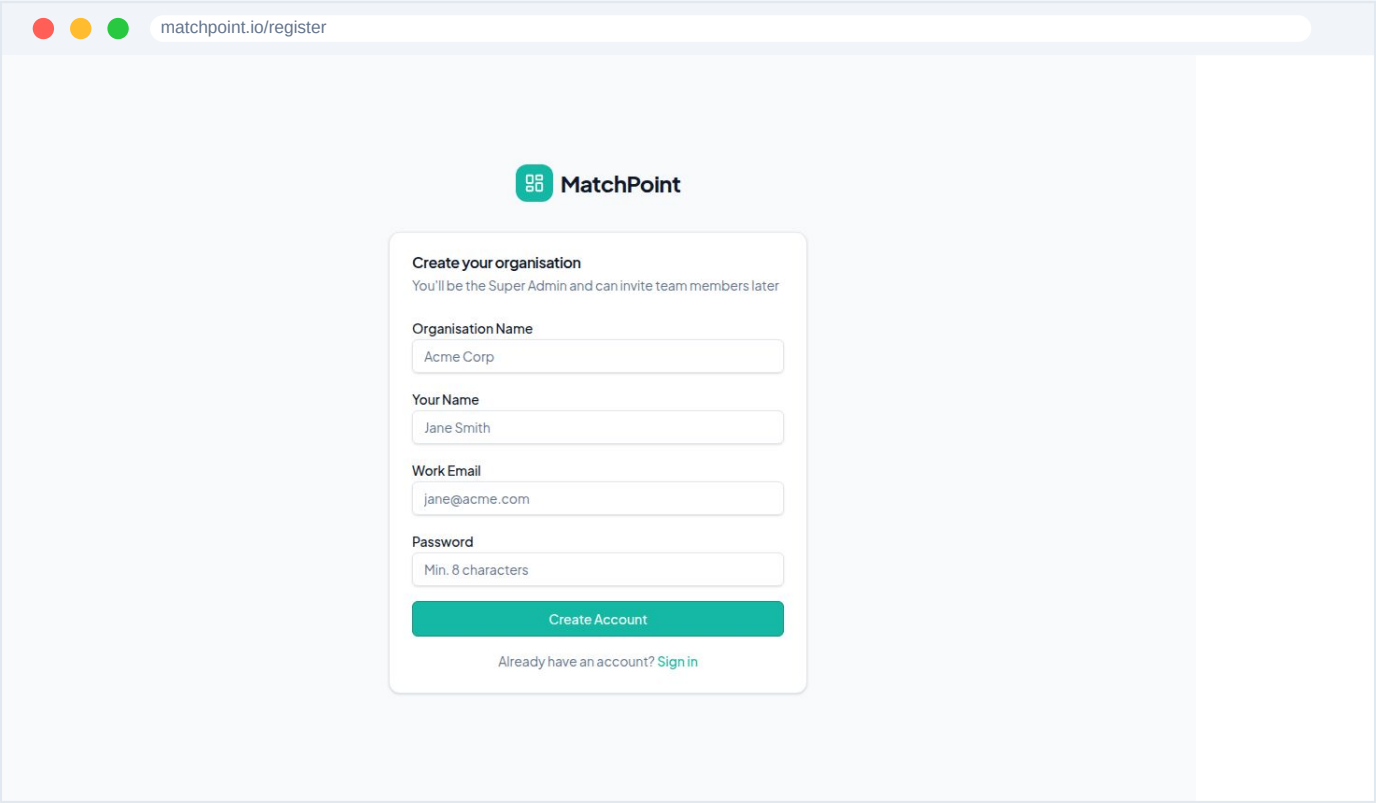
PUBLIC

Create Organisation

03

https://app.matchpoint.io/register

Register your company to unlock all enterprise features. You become the Super Admin for your organisation — the highest permission level.



Key Features

- Organisation name becomes your isolated tenant workspace
- Automatic Super Admin role on first registration
- All data is strictly isolated — no cross-tenant access ever
- Invite team members after registering from the Team page
- Up to 5 roles available: super_admin, hr_admin, hiring_manager, recruiter, employee

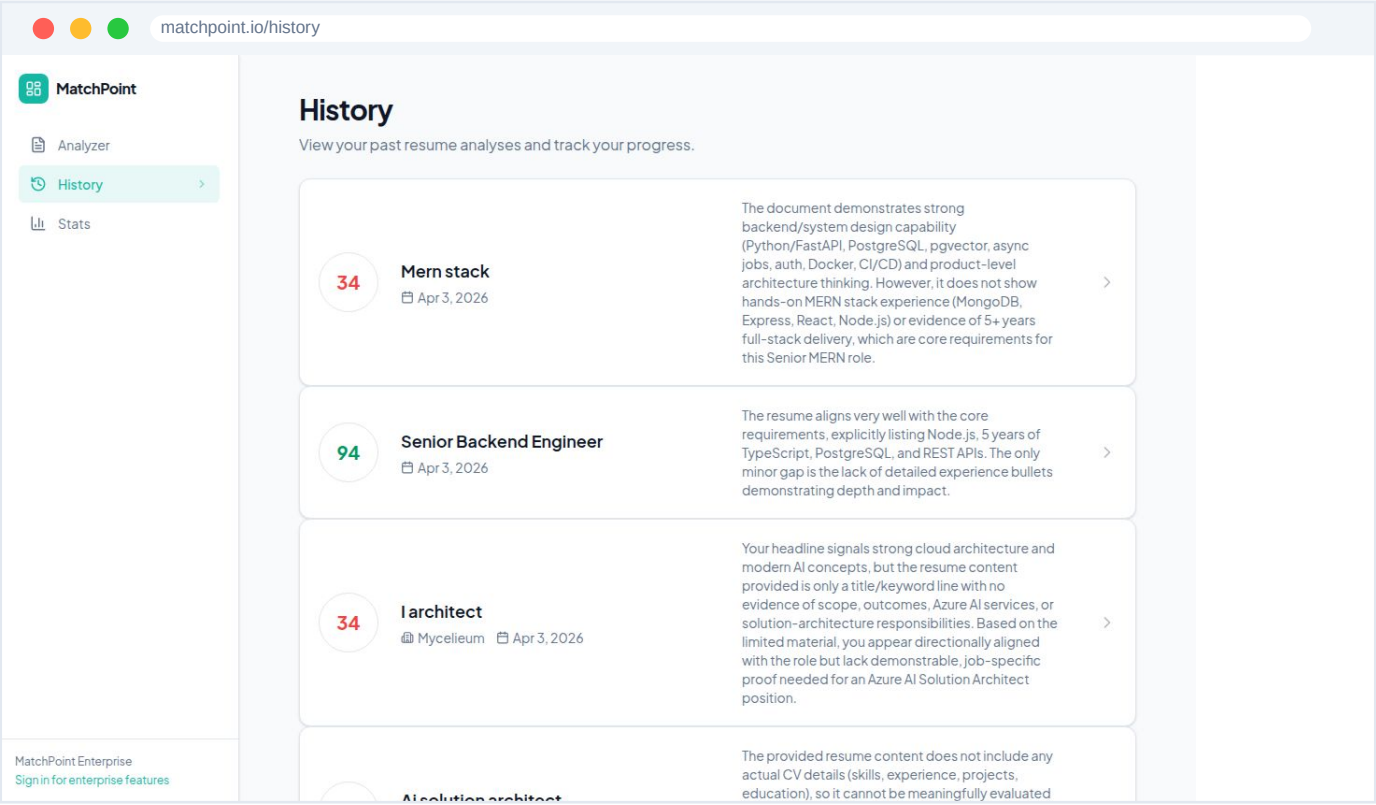
PUBLIC

Analysis History

04

https://app.matchpoint.io/history

View all past resume analyses run in the current session. Each row shows the date, score, job title, and a summary of the AI's assessment.



Key Features

- Chronological list of all analyses in the current session
- Match score badge with colour coding (red/amber/green)
- Job title and company extracted from the job description
- AI summary snippet for a quick at-a-glance assessment
- Click any row to re-open the full detailed result

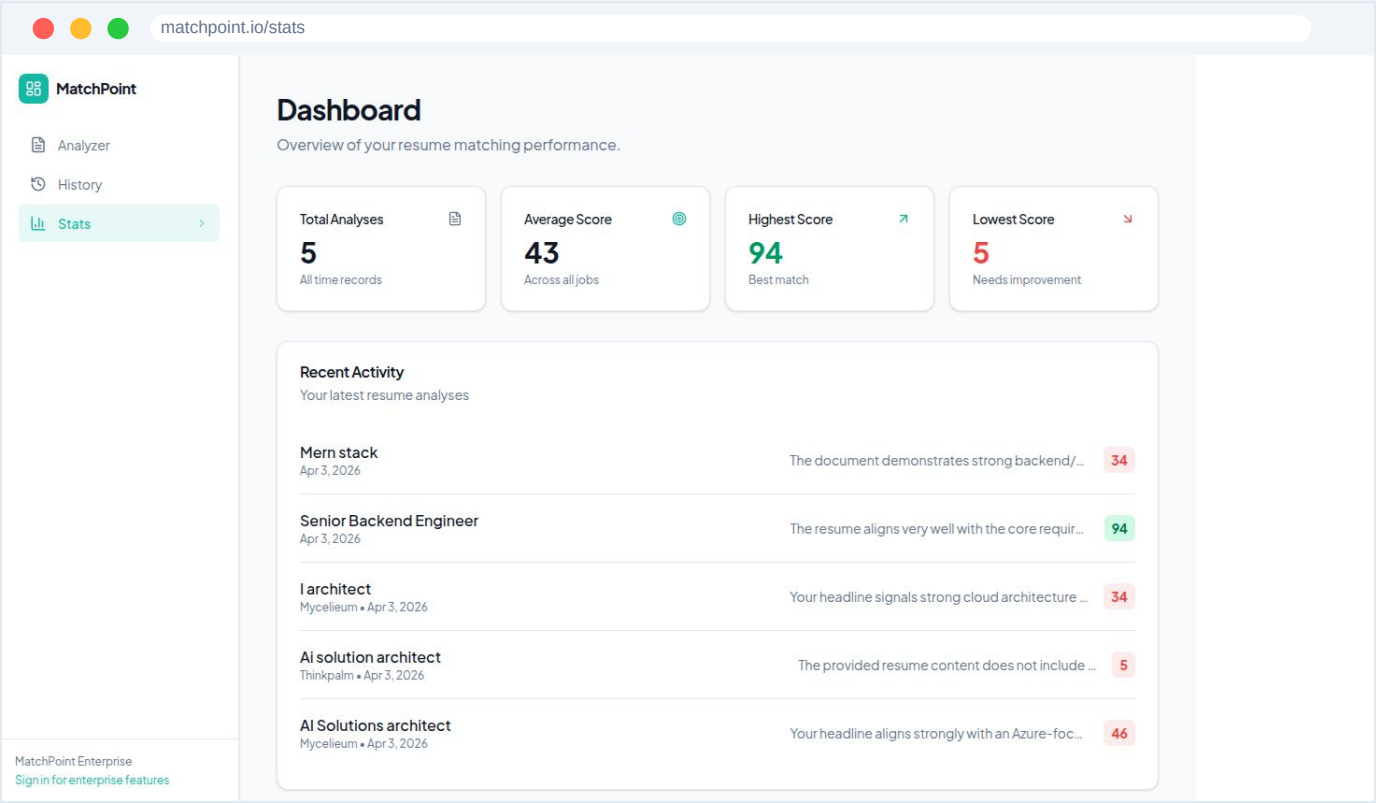
PUBLIC

Platform Statistics

05

https://app.matchpoint.io/stats

A dashboard showing aggregate metrics from all analyses run on the platform. Includes total count, average score, highest/lowest scores, and recent activity.



Key Features

- Total analyses count — all-time platform records
- Average match score across all analyses
- Highest and lowest scores with colour highlights
- Recent activity feed — latest 5 analyses at a glance
- Score breakdown by range — how candidates distribute across bands

ENTERPRISE

Candidate Pool

06

https://app.matchpoint.io/candidates

Central repository for all candidate resumes in your organisation. Upload PDFs or paste text. All profiles are searchable and available for analysis.

Feature Overview

- Upload PDF resumes with automatic text extraction
- Paste plain-text resumes as an alternative
- Candidate name and email extracted or entered manually
- Search candidates by name or email in the list
- View full profile with all past analyses linked
- Used as the source pool for Bulk Analysis and AI Shortlisting
- All uploads logged in the immutable Audit Log

ENTERPRISE

Job Descriptions

07

https://app.matchpoint.io/jobs

Create and manage the library of job descriptions used across all analyses. Three lifecycle states: Draft, Active, and Closed.

Feature Overview

- Full CRUD — create, edit, delete job descriptions
- Draft status — JD being written, not yet available for analysis
- Active status — available for bulk analysis and shortlisting
- Closed status — archived; no longer selectable for new analyses
- Filter the list by status using the tab pills
- JDs are automatically embedded for semantic similarity (text-embedding-3-small)
- Linked to bulk jobs, shortlists, and position tickets

ENTERPRISE

Bulk Analysis

08

https://app.matchpoint.io/bulk

Score your entire candidate pool against one job description in a single automated job. Results include per-candidate scores and are exportable to CSV.

Feature Overview

- Select any combination of candidates from the pool
- Choose one Active JD as the benchmark
- Async processing — runs in the background, page auto-refreshes
- Per-candidate match score, gaps, and key strengths
- Job statuses: Pending !’ Running !’ Completed / Failed
- Export all results to CSV for reporting
- Completed jobs retained for historical comparison

ENTERPRISE

Talent Pool Search

09

https://app.matchpoint.io/talent-search

Semantic full-text search across every resume in your candidate pool using TF-IDF scoring. Results are ranked by relevance with highlighted matching snippets.

Feature Overview

- Natural language or keyword queries accepted
- TF-IDF semantic ranking — finds the most relevant candidates
- Best-matching snippet extracted and highlighted per result
- Relevance score (0–100) shown per candidate
- Instant results — no separate indexing step required
- Returns candidate name, email, score, and a View Profile link
- Works across all resume text including embedded sections

ENTERPRISE

Skills Gap Analytics

10

https://app.matchpoint.io/analytics

Aggregate analytics across all analyses in your tenant. Visualise the most common skill gaps, top strengths, and score distributions to inform hiring strategy.

Feature Overview

- Top Skills Gaps — horizontal bar chart ranked by frequency
- Top Strengths — bar chart of the most common strong points
- Score Distribution — histogram across 5 score bands
- Section Score Radar — average per section (Experience, Skills, Education, Certifications)
- Filter all charts to a single Job Description
- Data updates live as new analyses are completed
- Useful for identifying hiring strategy gaps at the organisational level

ENTERPRISE

AI Shortlisting Agent

11

https://app.matchpoint.io/agent

Autonomous multi-stage AI agent that ranks candidates and generates a shortlist for HR approval. Human-in-the-loop: HR must approve before action is taken.

Feature Overview

- Select a JD and set the maximum shortlist size
- Agent works in stages: Search !’ Analyse !’ Rank !’ Report !’ Await Approval
- Real-time step log shows agent reasoning for full transparency
- GPT-5.2 individually evaluates each candidate against the JD
- Ranked shortlist with per-candidate reasoning, strengths, and concerns
- HR approves or rejects with optional note — webhook fires on each decision
- Approved shortlists trigger downstream n8n workflows (e.g. Gmail outreach)

ENTERPRISE

Candidate Q&A (RAG)

12

https://app.matchpoint.io/rag

Ask plain-English questions about your candidate pool. BM25 retrieves the most relevant resume sections; GPT-5.2 synthesises a cited, grounded answer.

Feature Overview

- Natural language questions — no query syntax required
- BM25 ranking retrieves the top resume sections per query
- GPT-5.2 synthesises answers from real resume content only — no hallucinations
- Every answer includes source citations: candidate name, section, snippet, score
- Conversation-style chat UI with message history
- Example queries: 'Who has Kubernetes experience?', 'Find candidates with a Masters degree'
- Resumes are chunked by section on upload for precise retrieval

ENTERPRISE

Position Board

13

https://app.matchpoint.io/tickets

7-column Kanban board for tracking every open role through the hiring pipeline. Drag and drop cards between columns to update status. SLA timers per priority level.

Feature Overview

- 7 columns: Draft !' Open !' Sourcing !' Screening !' Interviewing !' Offer !' Closed
- Drag-and-drop status transitions with instant save
- Priority levels: Critical (14d SLA), High (30d), Medium (60d), Low (90d)
- SLA warning (yellow) and breach (red) badges visible on every card
- Ticket detail: metadata, candidate pipeline, interviews, activity feed, comments
- Recruiter Workload view: bar chart of ticket count per recruiter + SLA breach counts
- Webhooks fire on position.opened and position.closed events

ENTERPRISE

Interview Scheduling

14

https://app.matchpoint.io/interviews

Day-grouped timeline of all interviews across every position. Schedule, complete, cancel, and record structured feedback — all from one page.

Feature Overview

- Filter pills: Upcoming / Scheduled / Completed / Cancelled / All
- Day-grouped timeline view — easy to scan the week ahead
- Schedule from ticket detail: date/time, type, duration, interviewers, link/location
- Interview types: Phone, Video, Technical, Onsite, Panel
- Add to Calendar button — RFC-5545 .ics download (Outlook / Google / Apple Calendar)
- Complete !' opens 6-dimension feedback dialog
- Request Feedback !' sends Teams DM to all interviewers (webhook event)

ENTERPRISE

Structured Interview Feedback

15

https://app.matchpoint.io/interviews

When marking an interview complete, rate the candidate across 6 dimensions with star scores and optional comments. Computed overall rating stored per interview.

Feature Overview

- 6 dimensions: Technical Skills, Communication, Problem Solving, Culture Fit, Relevant Experience, Motivation
- 1–5 star rating per dimension with optional comment
- Computed overall rating — automatic average shown as you score
- Free-text overall summary for qualitative notes
- Dimension scorecard displayed inline on completed interview cards
- Feedback stored as structured JSON in the database
- Used by interviewers and HR to compare candidates across rounds

ENTERPRISE

Integration Hub

16

https://app.matchpoint.io/integrations

Configure webhook endpoints, view delivery logs, test events, and download n8n workflow templates for Teams, Outlook, and Gmail automation.

Feature Overview

- HMAC-SHA256 signed webhooks — verify authenticity of every delivery
- 9 events: candidate.uploaded, shortlist lifecycle, bulk_job.completed, position.opened/closed, interview.scheduled, interview.feedback.requested
- Per-event filtering — subscribe only to events you need
- Delivery log: status, HTTP code, retry count, timestamp
- 3-attempt retry with exponential backoff on failure
- Test-fire any event to your webhook URL on demand
- 6 downloadable n8n templates in two categories: Shortlisting & Pipeline / Interview Scheduling

ENTERPRISE

Audit Log

17

https://app.matchpoint.io/audit-log

Immutable, append-only record of every significant action performed in your organisation. Provides a full compliance trail — cannot be edited or deleted.

Feature Overview

- Covers: auth events, uploads, JD changes, bulk jobs, shortlists, tickets, interviews
- Shows: timestamp, actor, action type, resource type/ID, and metadata
- Append-only — no DELETE routes exist for audit entries
- Chronological feed with newest entries at the top
- Useful for compliance, HR governance, and security audits
- Every enterprise action is logged automatically — no opt-in required

ENTERPRISE

Team Management

18

https://app.matchpoint.io/team

Invite and manage team members. Assign roles that control what each person can see and do across the platform.

Feature Overview

- View all users: name, email, role, join date
- Invite new users: set name, email, temporary password, and role
- Roles available: super_admin, hr_admin, hiring_manager, recruiter, employee
- super_admin: full platform access + user management
- hr_admin: all analyses, bulk jobs, shortlist approval, user management
- hiring_manager: create JDs, view analyses for their positions
- recruiter: run analyses, manage candidates, schedule interviews
- employee: upload own resume and view own analyses only
